

Sculpture Assembly Physical Details:

- Comprised of 8 gate sections, 3 feet wide each, totaling 24 feet wide.
- The great crest.
- The 8 gates consist of 2 at 8 feet high, 2 at 7 feet high and 4 at 6 feet high.
- 10 ornamental swirls that were used to cover the electric lights display wiring adding serious beautification. Each has a cast iron base support channel. This is the only cast iron in the assembly. Everything else is comprised of either brass leaves or wrought iron. We suggest that if the ten swirls were separated into a set of 2 with 5 swirls each, it would also be a fine set of gates additionally.
- 4 solid steel support posts 7 feet tall: 2 at 3x3 and 2 at 1x3 with designer tops. They are not yet hard-baked color finished.
- The sculpture finish is a hard-baked enamel-like surface called powder coating; modest gold color.
- Weight is approximately 3,000 lbs.
